painting, hiking, traveling,
rock climbing, reading

>About me

I am a graduate of a study programme Chemistry of Natural Substances at the Faculty of Chemistry at BUT.

After obtaining my first job as a Q&E Specialist, I've come to realize that I need creativity in my work. That is the reason why I've decided to make a career switch to the world of UX design.

From my education I know how to conduct research and analyze data while remaining unbiased. I'm like aesthetically pleasing and functional designs.

I am open to new work experiences and excited to work in a team of designers.
